## EDUCATION

---

### Lewis-Clark State College

Lewiston, ID

*Bachelor of Science in Computer Science, expected graduation May 2023*

- President listed for 2 consecutive years (GPA 3.75/4.0)

## EXPERIENCE

---

### Idaho Cyber Security Range

Lewiston, ID

*Security Intern*

*May 2021 – Present*

- Building Lewis-Clark State College's cybersecurity range internal and external infrastructure.
- Actively participated in coordinating both physical security procedures, firewall risk assessments and planning the range's network infrastructure.
- Integrating an Active Directory network using Openstack virtualization management and Samba for managing multiple student user accounts.
- Manipulating Linux software packages' configuration and scripts to bridge Openstack and Samba's compatibility.
- Established the first operational cybersecurity range networks out of 9 different institutions in Idaho alongside my team.
- Experience in setting up the range's firewall, single-node server and UNIFI switch from scratch. Including server network routing and physical cabling throughout the range.

### Lewis-Clark State College

Lewiston, ID

*Library Circulation Desk Assistant*

*February 2021 – Present*

- Maintaining library facilities to comply with health and safety guidelines.
- Assisting or guiding patrons on using library resources in order to achieve better results whilst researching.
- Greeted visitors and determined to whom and when they could speak with specific individuals.
- Recording patron's visits and numbers of patrons to assess current facility status and it's priorities.

## SKILLS

---

- Skilled and proficient in: C, C++, Python and BASH
- Proficient in: Git, MySQL, MSSQL, HTML, CSS and JavaScript
- Other proficiencies: Openstack/VMWare or similar virtualization software, Active Directory, Samba, FOG Project, Windows, and Unix systems

## PROJECTS

---

- A fully functioning time differential calculator written in Python for library student workers who are frustrated with Idaho State's I-Time pay system.
- Created a simple resource website on the Computer Science department's server to help new students find free resources to expand their interest and knowledge in their major.
